What's New In?

Previously known as ChromePlus, CoolNovo is a portable web browser that is very easy to use, supports multiple add-ons, and lets you navigate with ease through multiple web pages on an on-the-go. The web browser offers several tools that you will definitely enjoy, such as mouse gestures, Adblock for blocking the display of ads, Internet Explorer mode for websites that don't support CoolNovo, translation services, themes, downloads, capturing and the settings manager. Other features include super scrolling, snapshots, data synchronization, and privacy protection. You will be able to get used to the CoolNovo GUI very quickly and enjoy all its features without problems, since this browser does not leave any traces on the system that won't be erased after its uninstalling. CoolNovo is a clean, portable web browser that includes a lot of features, and users can expect all that is necessary for a fast and secure web browsing experience. This is the portable edition of CoolNovo, so installing it is not necessary. In other words, you can save the web browser to a storage device (like a USB flash drive) and directly run its executable file on any computer. What's more important is the fact that the Windows Registry is not updated with new entries, and no files are left behind on the hard drive after deleting the program. Plus, you can have CoolNovo with you whenever you're on the go. The interface of CoolNovo is familiar to the one of Google Chrome, so navigating through its features shouldn't be a problem if you are already accustomed to the well-known app. CoolNovo packs some powerful tools, such as mouse gestures for easy accessibility, Adblock for blocking the display of ads, Internet Explorer mode for websites that don't support CoolNovo, as well as the bottom toolbar from where you can quickly access a translation service, themes, the downloads page, a capturing tool, zoom, volume mute and browsing data clearance. Additional features of CoolNovo focus on super dragging, privacy protection, data synchronization via your Google email account, and incognito navigation mode. The web browser provides a good navigation speed through web pages, has a good response time, includes user documentation, and uses a moderate-to-high amount of CPU and system memory. We have not come across any issues during our tests, since the software app did not freeze, crash or pop up error dialogs. All in all, CoolNovo should please users
